ABOUT OUR ORGANIZATION

Alpha Caring Community Development Corporation (ACCDC) began operation in 2002. As a community non-profit organization, our vision and goal is to deliver resources that are scarce but necessary for students to excel academically and for adults to advance in their career goals.

With over 30 years of experience in the field of education, our staff and volunteers are certified professionals who are here to deliver quality tutoring programs to assist middle and high school “After Three” students. The name “After Three” refers to the programs we offer after 3 pm or whenever the regular school day ends.

Our mission would not be achieved without being an organization that is driven to strengthen the fibers of our community. Therefore, we invite members of the community to our forums that address many of the social, economic, health care, and domestic issues that impact our community.

Our services are available to all, regardless of race, ethnicity, and religion.

TUTORING & PROGRAMS

In the United States, 7 out of every 10 fourth graders cannot read or do math at their grade level. At ACCDC, all of our sessions are designed to supplement and enhance the instructions and skills students receive at school in the area of reading, language arts, mathematics, and technology.

➤ LANGUAGE ARTS & LITERACY

Tools that increase students’ level of reading comprehension are used to accelerate their performance in related subjects at school.

Writing strategies are applied to reinforce students’ spelling, grammar, and organizational skills.

➤ MATHEMATICS

Assistance is provided in the areas of number theory, algebra, problem solving, geometry, and general mathematics.

$$\begin{array}{r} 510784.36 \\ 2.7 \overline{)9372} \end{array}$$

➤ TECHNOLOGY IN EDUCATION

Knowledge of computer technology is in great demand in today’s academia and various industries.

Our students learn how to navigate Microsoft office applications, create and edit word processing documents, and publish documents with graphics. In our more advanced

classes, students learn how to develop databases and manage data.

➤ PREPARING FOR COLLEGE

We walk you through the steps for preparing for college. We inform our students and parents on admission requirements, S.A.T. Scoring, Scholarship information, and financial requirements.

➤ SAT PREPARATION CLASSES

Our teachers review the new SAT format with students. They prepare students for taking the exam by reviewing all sections of the exam. Increase your SAT scores. Enroll today.

➤ WORKSHOPS

We host workshops that equip parents for preparing their child for college. Our workshop topics include: College Board Tests, Planning for College, Summer Learning Programs (diversifying the high school experience), Summer Employment, and College Search.

➤ CAREER COUNSELING

In addition to our educational services, we invite community leaders to lead family strengthening forums, substance abuse workshops and career counseling for both high school students and adults.
